System Requirements

Minimum System Configuration:

If your system does not meet any one of the following minimum system requirements, **Disney Universe** will not run properly.

Microsoft® Windows® 7 / XP® SP3

3.0 GHz Intel® Pentium® 4 class or AMD Athlon™ 64 3500+ or equivalent processor

2 GB RAM

4.0 GB free hard drive space

256 MB 3D video card supporting Shaders 4.0 (NVIDIA® GeForce 8400 or higher, ATI Radeon™ 2900 or higher)

NOTE: Onboard (built-in) integrated chipsets are not supported (e.g., Intel® on-board 8xx/9xx series chipsets, SiS and S3 series, ATI® Mobility Radeon® 7500 & X1300)

8x DVD-ROM drive

Microsoft® Xbox 360 Controller (optional, but recommended)

IMPORTANT!

In addition to meeting the Minimum System Requirements, it is highly recommended that you ensure that your computer's components are utilizing the most recent software drivers.

MICROSOFT WINDOWS® 7 DISCLAIMER:

This product's installer is not designed to work around the upgraded User Account Control features that Windows 7 provides. Administrative Privileges are required to install and uninstall the program. Depending on your system configuration, you may also be required to have Administrative Privileges to play this program. If you need additional information on User Account Control, please refer to Microsoft's Technet Website: <http://technet.microsoft.com/en-us/library/cc730655.aspx> or your Windows 7 documentation.

MICROSOFT WINDOWS® XP DISCLAIMER:

Although this program will install and run on a system running Microsoft Windows XP, users with "Limited User" privileges will encounter difficulties. This program's installer is not designed to work around the upgraded security features that Windows XP provides. Administrative Privileges are required to install and uninstall the program. Depending on your system configuration, you may also be required to have Administrative Privileges to play this program. Please refer to your Windows XP documentation for information about "Administrative Privileges."

Return to Home Menu

Installation: Disney Universe

1. Insert Disc.
2. If Autoplay is turned on, go to step 4.
3. If Autoplay is turned off, open (My) Computer and double-click on the **Disney Universe** disc icon.
4. At the Disney Universe installation splash screen, click on **Install**.
5. Click **Next** at the Welcome screen.
6. Click the button to accept the terms in the License Agreement, then click **Next**.
7. Click the button to accept the terms in the License Agreement for DirectX, then click **Next**.
8. Select **Default** or **Custom** installation. If Default, go to step 11. If Custom, go to next step.
9. Select the path where you want the game installed, then click **Install**.
10. Disney Universe and related components will begin installing.
11. Once the game is installed, the Disney Universe splash screen will appear with the option to **Play**.

[Return to Home Menu](#)

Uninstalling Disney Universe

1. Insert Disc.
2. If Autoplay is turned on, go to step 4.
3. If Autoplay is turned off, open (My) Computer and double-click on the **Disney Universe** disc icon.
4. At the Disney Universe splash screen, select **Uninstall**.
5. Follow the on-screen instructions to complete the removal of the program.

World Select

Enter the exciting worlds of *Monsters Inc.*, *Pirates of the Caribbean*, *Tim Burton's Alice in Wonderland*, *Aladdin*, *Wall-E* and *The Lion King* by choosing World Select from the main menu.

Progress through the levels of the different worlds finding gold, stars, power-ups and collectibles. You'll explore each world, earning gold for new costumes as you beat the levels and the bad guys.

[Return to Playing Disney Universe](#)

Costumes

As you play through the game, you'll unlock new costumes for each of the worlds. Once a costume is unlocked, you must have enough gold saved to buy it in the Costume shop.

Every costume has a special tool; you can upgrade those tools by collecting stars that can be found in hidden treasure chests throughout the worlds.

Return to Playing Disney Universe

Player Area

View all the rewards and badges you've earned in Disney Universe from the player area.

In this area, you can also check out stats such as enemies defeated, guests rescued (i.e., costumes unlocked), and gold on hand.

[Return to Playing Disney Universe](#)

Playlists

Select from and replay your favorite levels from the different worlds you have previously unlocked during gameplay. Once selected, you can play the third level of Wonderland Woods in the *Alice* world followed by the second level of Agrabah Palace in the *Aladdin* world, for example.

You can also select to create random playlists that'll take you on a fun, fast adventure through the worlds.

[Return to Playing Disney Universe](#)

Viewer

View concept art and character models and listen to music and songs featured in Disney Universe. Unlock more fun stuff by collecting special items found in each level of the game.

Options

Adjust visual, sound and game settings in the Options menu. In this menu, under game settings you can activate Help Arrows. When

active, arrows will direct the player to the current objective in the level being played.

Credits

View a list of the awesome people that worked on Disney Universe.

Quit

Select to quit the game and return to the desktop.

Special Attacks

You can perform several special attacks, using combinations of the Space bar, C key and V key. Test out new multiple key combos after mastering the following special attacks:

Double-Jump Ground Slam Attack

Double tap the Space bar, then hit the C key to jump up and slam down to the ground. This attack is effective when surrounded by enemies or to demolish hazards.

Uppercut

Press and hold the C key for a second and release to perform a thrusting uppercut and jump.

Uppercut Slam

Press the C key and continue holding to perform an uppercut and jump before slamming to the ground.

Counter-attack

When an enemy is about to perform a spin attack, press the V key for a counter-attack. Watch for the lightning bolt prompt above an enemy's head when a counter-attack is possible.

[Return to Playing Disney Universe](#)

Challenges

Each level contains challenges that are activated by the Challenge console. Completing level challenges earns badges that count toward your final score as well as unlockable rewards.

Make sure to look for and approach the Challenge console before exiting a level.

Take on and beat the challenge within the allotted time to boost your score and show the bad guys who's boss.

Collectibles

Gold

Collect gold to purchase costumes from the [Costume Shop](#) and to gain entry into new worlds.

Stars

Collect Stars to upgrade your tools for more powerful hits. Stars can be found in hidden treasure chests throughout the worlds.

World Collectibles

You can also collect bonus items for each Disney world. Collect all the world-specific bonus items in a level to unlock concept art, character models and music.

[Return to Playing Disney Universe](#)

Saving the Game

Game progress in **Disney Universe** is saved automatically after completing a level and whenever you see the icon displayed below on screen. Do not turn off your computer while saving is in progress.

TROUBLESHOOTING BASICS

There are several things you can do to make sure that your computer system realizes the full potential of the program.

1. Determine if any changes have been made to the system.

A frequent source of conflict between hardware and software is a system configuration change. If an error occurs after making a change to the configuration of your system (i.e., adding new hardware, updating drivers, installing another program), then that system change is a likely source of the problem. Refer to the manufacturer's instructions to verify that the proper installation procedure was used and note any incompatibility issue or system modifications listed in the documentation.

2. Isolate the source of the problem.

The program itself does not necessarily cause errors that occur when running a software program. These errors may be caused by the operating system, a conflict between hardware settings, another program running in the background, or an obsolete driver, which has not been updated to work with the system's newer components. Determine exactly when and where the problem occurs, and whether or not the problem also occurs with other software programs. Also determine what other system activities are taking place when the problem occurs. Determining the exact circumstances under which a problem occurs often points to a solution.

3. Determine if the error can be reproduced.

Restart the program and test for the error. If the same error occurs in the same location, uninstall the program, reinstall the program, restart the system, and then run the program again. If the error recurs, determine if a similar error occurs with other software programs. If it does, the source of the problem may be one of the system's hardware components. Refer to your hardware documentation or contact the manufacturer to determine if an updated driver or system modification will resolve the issue.

4. Verify that your system meets or exceeds the minimum system requirements of the program.

If your system does not meet any one of the minimum requirements, the program will not run properly.

5. Verify that all external cables and connections are secure.

Also ensure that power, settings, and option controls for all system components are set appropriately. Refer to your hardware documentation or consult your hardware manufacturer for additional information.

6. Exit all other programs and applications when installing or running the program.

Exit any active screen savers, utility programs, anti-virus programs, or shell programs to ensure that the maximum amount of RAM is available for your system to run the program as quickly and smoothly as possible. Also exit any automatic power saving utilities or other timing programs like an anti-virus program that scans your hard disk every hour or a power management utility that shuts down all non-essential system functions during idle periods. If a timing program or screen saver activates during installation or during play, the program may crash or experience other technical difficulties.

UPDATING DRIVERS

Installing the latest available driver for your video card and sound card can result in a variety of benefits, including increased system performance, new component features, or the elimination of a technical problem. If your computer locks up, the video appears choppy, or the screen goes black, an updated video driver may solve the problem. An updated sound driver may result in crisper, clearer sound.

Computer system and component manufacturers are constantly updating their drivers so that their hardware can play the latest software programs with the best possible performance. If you determine that your system is not using the latest driver, or your current driver is dated earlier than one year prior to today's date, you should consider obtaining an updated driver.

If your video card and sound card were included with your system at the time of purchase, contact the manufacturer of your computer system about obtaining the latest version of a driver. If you have purchased a system component separately from your computer system, contact the component manufacturer to obtain the latest version of the driver. Updated drivers are frequently available from the Internet. Refer to your hardware documentation for contact information.

CUSTOMER SUPPORT INFORMATION

Internet Support

The Disney Interactive Studios Customer Support website contains an array of useful information to help your system run Disney Interactive Studios programs with the best possible performance. To access information about Disney Interactive Studios programs on the internet, point your browser to disney.com/videogames and click on "Support" at the top of the page.

Automated Telephone Support

You may contact Disney Interactive Studios Customer Support at **(800) 228-0988**. This service is available 24 hours a day in the US and Canada. Using a touch-tone phone, you can obtain answers to some of the most frequently asked questions regarding Disney Interactive Studios programs. If you need additional information, our Customer Support staff for the US and Canada is available Monday through Friday from 9:00 a.m. to 6:00 p.m. (Pacific Time).

Mailing Address

If you wish to write us, our address is:
Disney Interactive Studios Customer Support
500 South Buena Vista Street
Burbank, CA 91521-9323

Telephone Support

You may contact Customer Support at **(800) 228-0988**. If you need additional information, our Customer Support staff for the U.S. and Canada is available Monday through Friday from 9:00 a.m. to 6:00 p.m. (Pacific Time).

TTY/TDD Users

Please contact us by telephone through your local relay service. Customer Support staff for TTY/TDD users is available Monday through Friday 9:00 a.m. to 6:00 p.m. (Pacific Time). Our toll free number is **(800) 228-0988**.
